# Pilot's History & Timeline

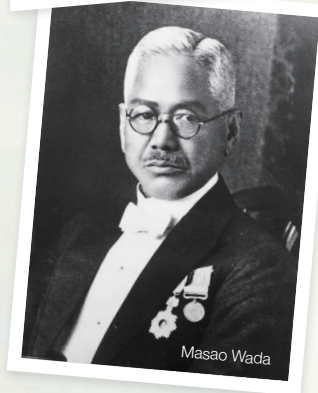

Pilot's founders, Ryosuke Namiki and Masao Wada, both graduates of the Tokyo University of Mercantile Marine, formed a lasting friendship while serving on the Ariake Maru, a merchant ship. United by a dream to create something uniquely Japanese, they decided to embark on this journey together. In 1906, after leaving the merchant navy, Namiki began a teaching career. His interest in research led him from studying ruling pen wear to crafting gold fountain pen nibs, a venture that gained significance amid the growing popularity of fountain pens.

In 1914, Namiki achieved a breakthrough by machining a pen point from natural iridosmine ore. Focused on his research, he resigned from his professorship to devote himself entirely to developing a gold fountain pen nib. Despite facing numerous challenges in the meticulous crafting process, Namiki's dedication persisted. In 1915, Wada, his old friend, sent a significant sum of 5,000 yen to support Namiki's endeavors, reinforcing their deep bond.

Buoyed by this encouragement, Namiki achieved a milestone on February 9, 1916, by completing a 14k gold fountain pen nib entirely made in Japan. Sharing his joy with Wada, they decided to establish a dedicated fountain pen company. Wada, inspired by the success, chose to leave his previous business behind, committing his life to the fountain pen venture alongside Namiki.

Parallel Pen 54

Iro-Utsushi 56

## Parallel Pen®

The Parallel Pen is an innovative calligraphy tool that produces crisp, smooth lines with consistent ink flow using its unique, dual-plate nib technology. The nib design allows for remarkable color-blending effects by holding two nibs together for a few seconds before writing. Each set includes a pen, ink cartridges, a pipette for nib cleaning, and a use and care guide to help elevate you to the next level of artful writing.

Standard

Soft Writing

Specialty

**Extra Fine (EF):** This nib has a firm tip for intricate, small lettering, resembling a nearly needle-like point.

**Fine (F):** Designed with a hard tip, this nib is perfect for precise, fine lettering.

**Fine Medium (FM):** Striking a balance between Fine and Medium, this hard nib suits those seeking a versatile, in-between option.

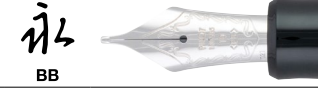

**Medium (M):** With a firm nib tip, this option is ideal for clear- and medium-width lettering.

**Broad (B):** This hard nib is tailored for bold lettering, producing striking lines.

**Double Broad (BB):** With a robust, firm, and large tip, this nib excels in very bold lettering. Situated between Broad and Coarse options.

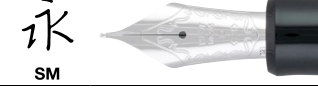

**Soft Fine (SF):** This nib boasts a soft touch, making it perfect for fine lettering with a subtle flexibility.

**Soft Fine Medium (SFM):** A soft nib that bridges Fine and Medium, offering a delicate touch combined with versatility.

**Soft Medium (SM):** Featuring a soft nib, this choice is great for producing medium-width lettering with added flexibility.

**Posting (PO):** A hard nib with a downturned tip shape, this choice creates fine, crisp lines with minimal pressure. Preferred for writing on paper prone to feathering.

**Falcon (FA):** This nib exhibits subtle flexibility while writing, enhancing expressive qualities, and providing variation in line thickness.

**Waverly (WA):** Engineered with a slightly upturned tip, this nib delivers a uniquely flexible and custom writing experience, with exceptional smoothness from any angle.

**Stub (SU):** Highlighting a squared-off tip, this traditional italic nib creates broad vertical strokes and thin horizontal lines, making it ideal for calligraphy.

**Coarse (C):** With an extra broad nib, this option produces extremely bold lines for a commanding presence.

**Music (MS):** Features three tines and was originally designed for writing sheet music and calligraphy. Modern italic nib.

**Signature (S):** Designed for increased flexibility, this nib allows for subtle variations in line width with changes in writing pressure.
